

You've heard about Chinese medicine from the media, but you're probably wondering:

## WHAT CAN ACUPUNCTURE AND HERBAL MEDICINES REALLY DO? (ESPECIALLY AT THIS CLINIC)

1. In Chinese medicine, EVERY symptom that makes you uncomfortable is taken seriously. The symptoms as well as the underlying cause of them are *treated as early as possible* to prevent diseases from occurring. Previous surgery to remove an organ will make treatment more difficult. But Chinese medicine will still try to help you replace the toxic prescription drugs you're taking with various all natural HERBS, acupuncture and exercises to help you live a more comfortable life.
2. Expensive tests and equipment are NOT used in Chinese medicine for diagnostic purposes. Diagnostic methods in Chinese medicine are just as accurate if not more than Western medicine's. It is absolutely crucial for patients to tell the physician of Chinese medicine *every symptom they have, no matter how strange they seem*. The accuracy of a diagnosis depends on this.
3. Injuries from cars and other accidents, which cause internal/external damage, like bruises and back pain can be effectively treated.
4. Headaches (including migraines) of all types can be successfully treated.
5. Effectively treat symptoms associated with asthma, heart disease, artery blockage, stomach disorders, urinary problems and specific female diseases.
6. Eliminate gallbladder and kidney stones *without surgery*.
7. Treat infants and children for fever, cough, sinus, mucus, lung, and thyroid disorders as well as middle ear infections.
8. Skin disorders have been treated at this center with good results.
9. Alzheimer's, osteoporosis, hypertension, diabetes, stroke, Bell's palsy and weak legs can be treated. It should be emphasized that *true healing takes time*. The longer a patient has been suffering from symptoms associated with these diseases, the longer the treatment will take.
10. Chronic sinus infections and allergies have been treated with excellent results.
11. AIDS patients are welcome to visit and consult with us to see what Chinese medicine can do for them. Our treatments DO NOT HAVE ANY of the ominous side effects associated with the toxic drugs presently available to treat AIDS.
12. All acupuncture treatments given at this center are guaranteed to have no side effects. (See Healing Crisis) Sometimes treatments will result in a slight redness or bruise, but this is perfectly normal and will clear up soon. Disposable needles are also used to protect both patients and physicians from possible spread of infections.
13. **ALL herbs used at this center are essentially equal to FOODS. The word HERB is used to describe a food used for medicinal purposes. Herbs will be naturally eliminated from the body within 24 hours, just like the foods you eat.**
